

THE TVI RETREAT
Sponsored by

OCT
SEPT 1952

THE PHIL-MONT MOBILE RADIO CLUB

NEXT MEETING: Cassidy School, East entrance between 65th and 66th on Lansdowne Ave.

DATE: First Monday of the month at 2000.

REFRESHMENTS AND DOOR PRIZES.

Oct. meeting--NIP will speak on the technical side of what capacitors and resistors are, how they are made, and how to use them. We also have, by popular demand, a return of "Silent Service" -- a submarining warfare movie featuring actual periscope pics.

Nov. meeting - QQH will talk on vertical antennas for the particular home owner
(HI - George)

THE LATEST SCOOP:

Visitors to the last meeting - 2DLY, 3PSS, 3PDJ, 3RFI, 1QMD, 3TMY

New Members: Dick W3IDR and Joe W3PLS have joined the ranks. Our membership committee, W3DM, will do the honors at the next meeting.

This blurb is happy to announce the marriage of Al Ricco, W2NBJ and his XYL Tina on September 21. Both have been constant help on our activities. Maybe it won't be long before Tina gets her WN call. This item may be a bit late, but our much appreciated monitor, W3CLM/ W3RNJ is now QRT. It seems that the wheels at WIBG felt that there might be some question whether they were paying 1st radio telephone ops to ham or keep WIBG on the air. In any event we thank all concerned for the help this monitor gave all the mobiles during their time on the air. Some possibility that Milt Connors with his new W3T?? call may take over here.

The sun will certainly shine on FEB 21, 1953. That's the day 3OQI, Bill takes him a wife. Doris is the name. Good luck to both and maybe Bill will have to settle for 29493.2 as a freq. for his hamming for the time being -- It only takes a small rig and QQH has offered to scrounge it from Bill's large stock of junk. Roy, 3PMD is departing around the first of the year for parts unknown. QQH is keeping his globe king with 275 watts warm on net freq. Roy didn't want the final to grow any moss. There is a possibility that is the club finds a permanent home, this quarter gallon of PMD's is the clubs for a nominal fee. W3RIE, Les is back from the land of Cocks with 6 stripes and a pretty wife. That's what happens when you transfer from supply to marine aviation. Les is to be stationed at Willow Grove Training reservists and expects to be on from there as K3NAF. W3CUB, Bill from Paoli, has joined this junket. The mid month meeting was held at his QTH. True antenna farm out there. Ranch style home, separate hamshack with acoustitex ceiling and smoking HT-18s. Anybody know whether PKY set a match in that VFO or did it just burn up naturally. Scuttlebutt has it that sever new car manufacturers will come out with 12 volt systems this year. Surplus market is going to take an upswing. KCG is now settled in his new job at KYW.

Here's the scoop on the first transmitter hunt. Start from Roxboro Reservoir Sunday, Oct. 5 at 1300. Have the judge, KCG sign your time slip. Commercial equipment other than converters will take a 45 minute penalty. Hunt and pull your hair out until 1500. If you, or some one else, haven't found it by this time listen on net frequency for W3RQZ with directions. During the hunt, W3RQZ/3 will transmit on 29626 KC with intermittent 400 cycle pulse and call sign every 5 minutes. A carrier (modulated) will be on the air at all times from 1300 to 1500. No help from fixed stations at any time. QQH will sign time cards in at hidden transmitter. The two shortest elapsed times recorded are the winners. First prize is a brand new Shore Bros CB12A carbon hand mike. Second prize to be announced. Only catch is that the two winners for this hunt must hide the gear for the next one scheduled around the first of the year. We would like to have one hunt every 3 months. "hat Say?

PXY has now moved into his new QTH. Let's stop out and see him at 200 Midland Rd., Springfield, Del. Co., Pa. SWA-6 3912 is the land line.

Apologies are here offered first for the lack of a blurb in August and second for the lousy typing in this edition. Temporary ED-QQH has a bad cold and stiff typing fingers. Maybe the meat of the digest will make up for the miserable editing and copying.

W3HYU
W3QFY

P.S. 3HYU promises to have another TeK-Ni-gram on noise elimination ready for distribution at the Nov. meeting. Be sure to attend. ;

Add P.P.S. Te. He. How come RCA equipment is used exclusively to show pix-on Philco quality? Again Te.He. Do we blame VVS or PXY?
